

Rootella® T

Rootella® T mycorrhizal inoculant effectively inoculates plants with vigorous endomycorrhizal fungi.

Mycorrhizal inoculation by application of Rootella® products improves plant nutrient uptake.

Net weight: 6 kg (13.2 lb) | Contains: 800 grow packs

PRODUCT APPLICATION

Place 1-2 Rootella® T grow packs in planting hole under seedling / sapling immediately prior to transplantation.

PRODUCT COMPOSITION

CONTAINS NON-PLANT FOOD INGREDIENT

5% Microorganism

Glomus intraradices 2,000 propagules/g (56,699 propagules/oz)

Glomus mosseae 250 propagules/g (7,087 propagules/oz)

Glomus clarus 250 propagules/g (7,087 propagules/oz)

95% Total Inert Ingredient (Vermiculite)

STORAGE

Protect from direct sunlight and store in a dark, dry and cool place between 5-25°C (40-77°F). Do not refrigerate or freeze.

TERMS OF USE

Any reproduction, breeding, transformation or reverse engineering is prohibited. Product embodies proprietary information and may be used only for agricultural purposes. Limitation of Liability: The mycorrhizal inoculant is sensitive to environmental conditions and Groundwork BioAg Ltd. is unable to make any warranties with respect to its performance. Groundwork BioAg Ltd. is not responsible for the use or misuse of this product. Liability is limited to the amount paid for the product (excluding shipping costs). Use only as directed. If you have any difficulty in the use of the product, please contact us at: info@rootella.com.

WARNING

Do not inhale. Long term exposure to any respirable mineral dust could cause slight effects on the respiratory system. Keep bag tightly sealed after use. **IF INHALED:** Move to dust-free fresh air. If respiratory distress develops, seek medical attention. See Safety Data Sheet for further details regarding safe use of this product.

USAGE

IMPORTANT Avoid use of systemic fungicides, as these may kill mycorrhizal fungi. Non-systemic or foliar fungicides and fungicidal seed treatments are mostly compatible. See Rootella® Compatibility Tool on website for more information. Minimize use of starter phosphorus fertilizer to enhance mycorrhizae.
